M06Project

Instructions

Use SAS to create a univariate model.

In the SAS for Finance book, Inflation Forecasting chapter, begin with the code in the section titled Univariate model to create a univariate model. Add a comment at the top of your SAS code that includes your name and assignment. Take screenshots of output and plots generated.

Paste the screenshots in to a Word document / PowerPoint presentation and 'Save As' a PDF.

Add your SAS code and PDF to the GitHub repo for M06Project.
